Who we are

Airox is the industrial air brand of Anwar & Company, serving Pakistan since 1960.

Every plant depends on the air moving through it. We build the systems that condition, move, clean and control that air.

Anwar & Company was founded in 1960 by Mr. Muhammad Anwar with one connection in Pakistan's textile industry. Six decades later, Airox carries that trust forward.

With 500+ customers and 3000+ projects, our reach has grown. Our values have not.

ANWAR & CO

AIROX
ANWAR & COMPANY

Our vision

To become a trusted name in high-quality industrial solutions.

Our mission

To deliver reliable, efficient air management that helps businesses run better.

Our promise

Built for a better tomorrow: people, performance and planet.

Quality
Built with care

Efficiency
Made to perform

Reliability
Ready for industry

What we do

Air control for demanding industry.

Temperature and humidity decide how well a textile mill, cement plant or food factory runs. Airox makes the systems that keep both under control.

60+	500+	3000+	3+
years of legacy	customers served	completed projects	countries

Industries we serve

Textile
Spinning, weaving and finishing

Food
Processing and packaging

Steel
Heavy industry ventilation

Agriculture
Processing facilities

Automobile
Workshops and plants

Real estate
Commercial and industrial buildings

Overhead Blowers

For ring spinning, auto cone, simplex frames and looms.

A simple, robust cleaner for 24-hour textile shifts. It clears and suctions fly at the source, keeping yarn clean and servicing costs low.

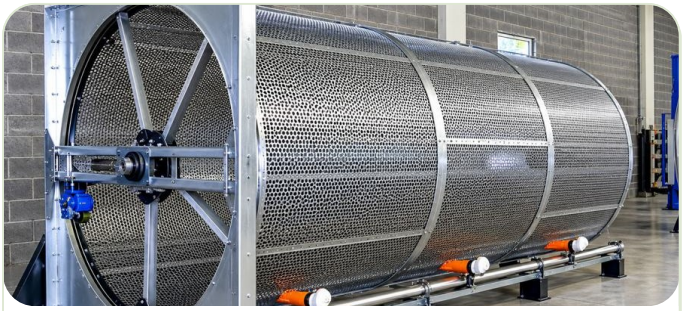

Humidification Plant

Everything the plant needs, from washing the air to controlling it.

Air Rotary

Rotating drum filter that keeps lint and dust out of the air.

Water Rotary

Cleans the recirculating spray water.

Air Washer

Washes and humidifies the air with fine water spray.

Axial Flow Fan

High-volume fan, 600 mm to 1600 mm.

G.I. Dampers

Control and balance airflow, manual or automatic.

Air-Tight Doors

Sealed, insulated doors for humidity chambers.

Humidification Plant

Continued

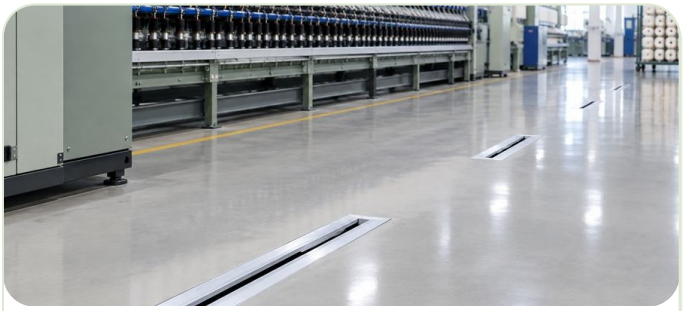

Spray Nozzles

Fine hollow spray in stainless steel.

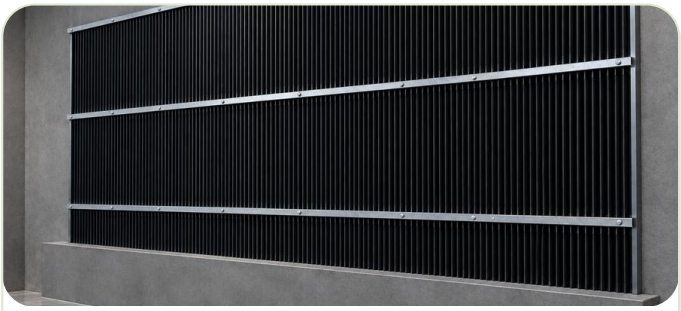

Diffusers

Spread air evenly from the supply duct.

Floor Grilles

Supply or return air grilles in many sizes.

Eliminator Plates

Catch water droplets so only humid air moves on.

Baffle Plates

Balance airflow inside supply ducts.

Need a complete plant?

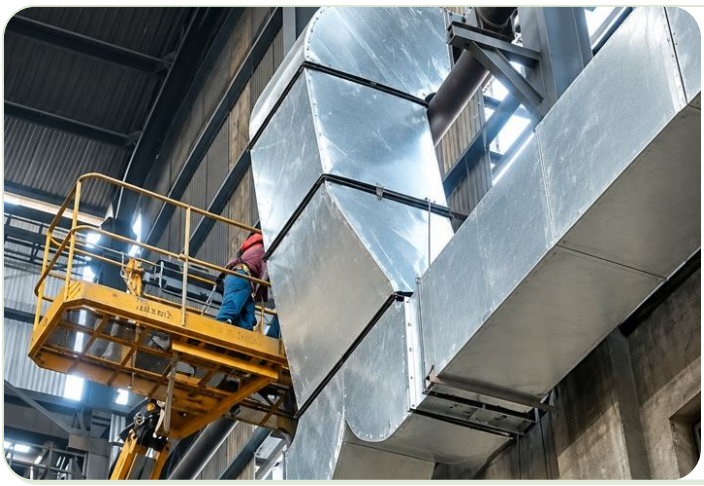

Tell us your space.
We will quote it.

Ducts

G.I., PVC and fibreglass ducting to carry air through your plant.

G.I. Ducting

Galvanised iron ducting for supply and exhaust air.

Supply | Exhaust

PVC Ducting

Corrosion-resistant ducting for humid or chemical areas.

Humid areas | Chemical areas

Fibreglass Ducting

Insulated ducting for conditioned air runs.

Insulated

Humidifiers

Duct, disc, evaporative and nozzle types.

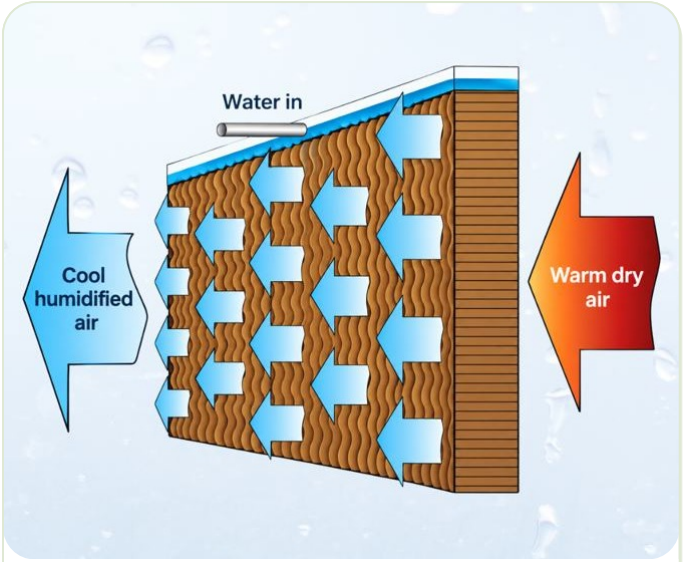

Duct Type

Adds moisture directly into the duct air stream.

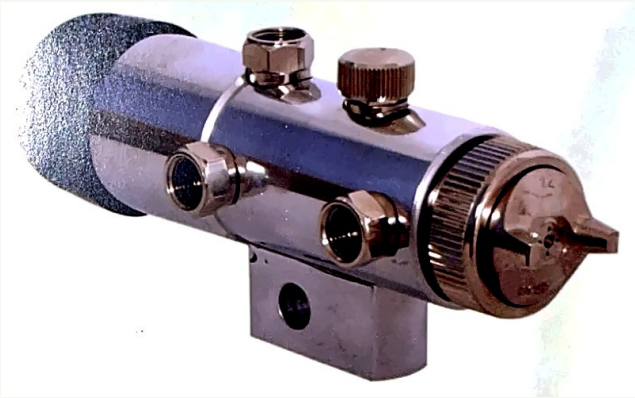

Disc Type

A spinning disc breaks water into a fine mist.

Evaporative Type

Wet cellulose pad cools and humidifies warm, dry air.

Nozzle Type

Fine, controlled atomisation for precise humidity.

Ventilation

Fans and coolers that keep large industrial spaces fresh.

Industrial Exhaust Fan

Wall-mounted fan that removes heat and stale air.

12" to 24" heavy duty

Heavy Duty Supply Air Fan

Mobile high-flow fan for spot cooling and ventilation.

Mobile

Evaporative Air Cooler

Cellulose-pad coolers for plants and workshops.

Large spaces

Dust Collection

Systems that clean the air and collect the waste.

Dust Collection System

Filters dust from process air, with efficiency up to 90%.

Up to 90% efficient

Transport Fan

Heavy-duty fan that moves dust-laden air through ducts.

Direct or belt drive

Fibre Compactor

Compacts fibre waste into a container or bag.

Blow room

Comber waste

Textile Equipment

For spinning frames and yarn handling.

Balloon Control Rings

Available in all sizes. Manufactured by Airox itself.

All sizes | Made by Airox

Yarn Conditioning Trolley

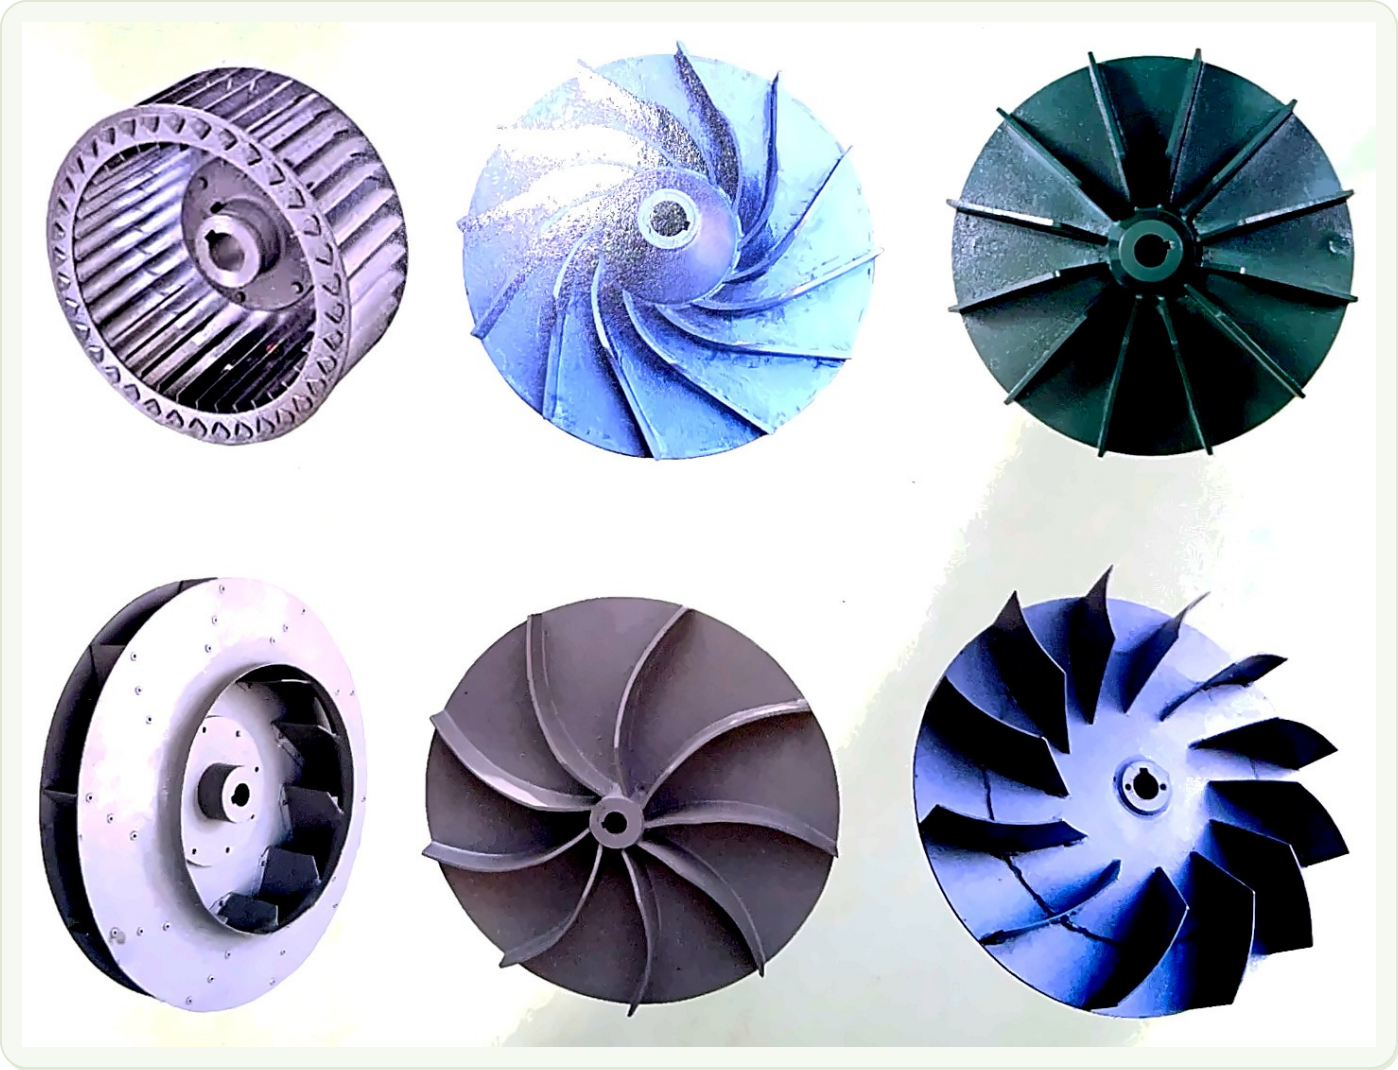

Stainless steel trolley for conditioning and moving yarn cones.

Stainless steel | Heavy duty

All Types of Impellers

Every type, size and material, balanced for smooth running.

1. M.S. fabricated
2. Aluminium fabricated
3. Aluminium cast
4. Water pump impellers in brass, C.I. and S.S.

Plastic & Rubber Parts

Replacement parts for the textile market, made to your requirement.

Long warranty | Timely delivery | Made to order

Made in our workshop

Our own die shop and machines, plus our own auto injection moulding machine, for consistent quality.
